SHORT PROFILE

I am an information technology student focused on cybersecurity and programming. Through practical experience and certifications (CS50x, Python Essentials 1), I have developed proficiency in programming, networking technologies, and software development. I actively expand my knowledge beyond school through workshops, courses, and certifications. I am seeking opportunities to further develop my skills in a dynamic environment.

KEY SKILLS

- **Programming:** Python, C, HTML, CSS, JavaScript, PHP
- **Networking Technologies:** Basic network administration, network configuration
- **Cybersecurity:** Basic knowledge of red teaming, security testing
- **Web Management:** Updating and managing website content
- **Additional Technical Skills:** Working with WordPress, Blender, and Linux

PROJECTS & ACHIEVEMENTS

- **CS50x:** Completed a course focused on algorithms, data structures, and software development.
- **Python Essentials 1:** Certification covering basic and advanced Python functions.
- **School Website Management:** Content management, data uploading, and layout optimization.
- **Hosting and Managing a Game Server:** Ensuring home server security, configuring plugins, developing a website with a dynamic map connected via an SQLite database.

WORK EXPERIENCE
